THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

EXAMINER'S AMENDMENT

Response to Amendment

1. Applicant's amendment filed 02/15/2008 has been entered and carefully considered.

Claim 42 has been amended.

Claims 7-11, 16, 21-23, 25-30, 36-41, and 47 have been cancelled.

Claims 48-50 have been added.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Lawrence M. Cho on 02/25/2008.

The applicant has been amended as follows:

In Claims:

48. A method for managing power data, comprising:

determining an amount of power used by a system running an application over a first time period from power data supplied to an operating system by a battery over the first time period;

determining an amount of power used for the system in a baseline state over a second time period from power data supplied to the operating system by the battery

over the second time period, wherein the power data includes a power capacity and a drain rate of the battery;

 determining a net power consumption of the application from the amount of power used by the system running the application and the amount of power used by the system in the baseline state;

 generating an indication of the net power consumption of the application to a user;

 determining a systematic error of the power data used for determining the amount of power used by the system running the application by determining an update granularity of the power data and dividing the update granularity of the power data by the first time period; and

 generating an indication to the user if the systematic error exceeds a predetermined threshold.

Reasons for Allowance

3. Claims 1-6, 12-15, 17-20, 24, 31-35, 42-46, and 48-50 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The combination as claimed wherein determining a systematic error of the power data used for determining the amount of power used by the system running the application by determining an update granularity of the power data and dividing the update granularity of the power data by the first time period (claim 1, claim 18, claim 48) is not disclosed, suggested, or made obvious by the prior art of record.

The combination as claimed wherein determining systematic error of an update frequency for the power data; generating a new run-time to run the application and displaying the new run-time to a user if the systematic error of the update frequency exceeds a threshold value; and determining a net power consumption of the application from the power data if the systematic error of the update frequency exceeds the threshold value (claim 13) is not disclosed, suggested, or made obvious by the prior art of record.

The combination as claimed wherein determining a net power consumption of the application from the amount of power used by the system running the application and the amount of power used by the system in the baseline state by computing a first net power value using power capacity data and a second net power data using drain rate data; and generating an indication to a user if the difference between the first and the second net power values exceeds a threshold value (claim 31) is not disclosed, suggested, or made obvious by the prior art of record.

The combination as claimed wherein determining the net power consumption of the application comprises subtracting the amount of power used by the system in the baseline state over the second time period from the amount of power used by the system running the application over the first time period (claim 42) is not disclosed, suggested, or made obvious by the prior art of record.

Thelander et al. (US 2003/0009705) disclose a power evaluation unit comprising: a data retriever unit (client service process 305) to retrieve power data (e.g. [0061]) to an operating system (301) by a battery (e.g. [0061], [0083], computer (205) is operating

from battery power); and a data processor unit (microcontroller) to determine a net power consumption of an application from the power data (e.g. [0060]).

Potega (US 2003/0085621) discloses the power data includes power capacity (e.g. [0149]) and drain rate data from a battery (e.g. [0186]), a data evaluation unit to determine a systematic error associated with a run-time for the power data (e.g. [0118]).

Culbert et al. (US 5,600,841) disclose a system for controlling power in electronic devices (Col.1, lines 11-14) comprise step of generating an indication to a user if the systematic error exceeds a predetermined value (e.g. Col.8, lines 8-12).

However, Thelander et al., Potega, and Culbert et al. do not disclose wherein determining a systematic error of the power data used for determining the amount of power used by the system running the application by determining an update granularity of the power data and dividing the update granularity of the power data by the first time period. Thelander et al., Potega, and Culbert et al. do not disclose wherein determining systematic error of an update frequency for the power data; generating a new run-time to run the application and displaying the new run-time to a user if the systematic error of the update frequency exceeds a threshold value; and determining a net power consumption of the application from the power data if the systematic error of the update frequency exceeds the threshold value. Thelander et al., Potega, and Culbert et al. do not disclose wherein determining a net power consumption of the application from the amount of power used by the system running the application and the amount of power used by the system in the baseline state by computing a first net power value using power capacity data and a second net power data using drain rate data; and generating

an indication to a user if the difference between the first and the second net power values exceeds a threshold value. Thelander et al., Potega, and Culbert et al. also do not disclose wherein determining the net power consumption of the application comprises subtracting the amount of power used by the system in the baseline state over the second time period from the amount of power used by the system running the application over the first time period.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
